**Teachers Audience:** 104  
**Responses Received:** 18  
**Response Ratio:** 17.31%

## Report Comments

This report is unique to a teacher (instructor or TA) and class. If the class sections have been merged together, there may be multiple sections represented in this data.

The response statistics at the top of this report show both course and teacher response counts.

The course and teacher response rates can be different, particularly if the course has multiple instructors/TAs. Sometimes students respond to the course questions but not the instructor/TA questions, or students skip the questions for this particular instructor/TA.

Practice questions and group discussions.
Allegra really tried to make sure we understood concepts, and spent time explaining when we felt stuck.
extra test review
The feedback on my homework was very helpful for knowing what i got wrong.
Having a section worksheet was nice to practice the newly learned concepts as well as emailing it out to us with the solutions was very nice for those who did not make it to section. Following along with the students to ensure that the concepts were understood.
Didn't go
She always started section with a clear agenda so the students knew what they were in for that day. Each section she followed a pdf document she previously prepared which included practice problems for students to collaborate on during the section.

**17. Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.**

I felt like the TA was there if I need them. I was doing really well in the course so I didn't really go to section
Going along class and solving with the class for worksheets
Didn't go
After attending an office hours, she sent out an email with some supplemental materials that I found interesting and useful for this course and potentially the other economics courses I'll have to take later on.
She was just great at explaining the concepts whenever I had specific questions. She was always very engaged with the students and you could tell she wanted to build connections with the students to further support them.

**18. Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.**

making the sections short. It would be more helpful to go over more topics in the class in these sections.
I'd go to section more if it was mandatory, but idk if that would make a difference for my success in the course.
